----- Episode 9: Henrietta Kedward Project Nightmares Case 36: Henrietta

Kedward Episode 9 has some great clues and dialogue, but one of the most interesting tidbits is when one of the players describes what to look for in the first picture they look at, in which Henrietta's sister (Hank's ex-wife, who was mentioned in Episode 7) is in the picture. A few people here have guessed that there are three kinds of pictures. The first is the obvious ones that anyone would see, just the man and the money (mug shots) or the man and the \$50,000 (license photo). The second kind is the picture you won't get if you're a certain person, which are a two of the pictures linked together. And the third kind of picture is one that only two people should see (and one person should have it), but one of those two people isn't actually in the picture.

Our episode, which starts off with a lot of chilling stuff, ends with some chilling stuff, especially with a man taking a picture in the next scene. The only people who would know about this picture are one of the main characters in the game (probably one of them or the person who took the picture) and Hank (who gets the picture after he gets kidnapped by the man). So it would be useful to figure out which character has the picture. However, I'll be frank and say that I really don't know which of the people actually have it. I assume that at least one of them has it (the one that has the mug shots and license photo) but I don't know which one it is. Anyway, if you figure out who has the picture then you should be able to figure out what to look for in the next scene and hopefully you can figure out what kind of picture it is. If not, you're in for a rough day... The Librarian / Jimsy
